

PRESS RELEASE

September 2023

The compact all-rounder MDS from RAUCH is now also available as a weighing spreader.

The single-chamber design and the comfortable, precise spreading in normal spreading and late top dressing as well as in boundary spreading make the MDS fertiliser spreaders so popular especially on small farms and for use in special crops such as wine, fruit and hops. All MDS models are now also available with an attached weighing frame. The QUANTRON-A spreading computer regulates the correct slider position while driving, depending on the driving speed and the flow characteristics of the fertiliser. A calibration test is under certain conditions.

In addition to the control, the scale reliably displays the remaining fertiliser quantity in the hopper. Optionally, the remaining area or the remaining distance to be spread can also be displayed in meters. Overloading operations can thus be planned at the ideal time. The weighing frame is designed to be mounted on the spreader's three-point linkage and connected to the fertiliser spreader's wiring harness. Retrofitting is possible.

The MDS precision fertiliser spreaders from RAUCH combine forward-looking technologies in a small space to offer you the greatest advantages. Precise fertiliser distribution and metering, uniform emptying, exact boundary spreading - the MDS offers an innovative solution that shows its strengths in almost all fields. The MDS inspires users all over the world with the ingenious single-chamber system and rewards them with precision and economy in different fields of application.

A family company, RAUCH was founded in 1921 and today is an internationally active manufacturer of agricultural and municipal services technology. The headquarters of the company are located in Rheinmünster near Baden-Baden. RAUCH develops and builds high-quality machines for fertiliser spreading and spreading technology for municipal winter services. In addition, RAUCH is an original equipment manufacturer of seed drill technology components. In the 2022 financial year, a turnover of 407 million euros was achieved with 407 employees. Around 73 percent of the products manufactured are exported.
